

Winter 2023

# Regional Water Resources Plan South East

Irish Water's 25 Year Plan for  
Our Water Assets

Tionscadal Éireann  
Project Ireland  
**2040**

Data disclaimer: This document uses best available data at time of writing. Some sources may have been updated in the interim period. As data relating to population forecasts and trends are based on information gathered before the Covid-19 pandemic, monitoring and feedback will be used to capture any updates. The National Water Resources Plan will also align to relevant updates in applicable policy.

Baseline data included in the RWRP-SE has been incorporated from numerous sources including but not limited to; National Planning Framework, Central Statistics Office, Regional Spatial and Economic Strategies, Local Authority data sets, Regional Assembly data sets and Irish Water data sets. Data sources will be detailed in the relevant sections of the RWRP-SE. 2019 was selected as the base year to align with the planning period (2019-2025) of the NWRP.

## Table of Contents

<b>1</b>	<b>Planning Context</b>	<b>1</b>
1.1	Introduction	2
1.2	Who We Are	3
1.3	Water Supply in the South East Region	3
1.4	Development of the National Water Resources Plan	4
1.5	RWRP-SE	7
1.6	Scoping and Screening for South East Region	8
1.7	Study Areas	8
1.8	Overview of RWRP-SE	9
1.9	Strategic Environmental Assessment and Appropriate Assessment	10
1.10	Summary of Policy	10
1.11	Stakeholder Engagement and Consultation on the RWRP	11
1.12	Baseline Data	11
1.13	Summary	12
1.14	References	12
<b>2</b>	<b>South East Region</b>	<b>13</b>
2.1	Introduction	14
2.1.1	Regional Overview	14
2.1.2	Study Areas in the RWRP-SE	16
2.2	Growth and Development	18
2.2.1	Current Population	18
2.2.2	Growth and Economic Development Policies	19
2.2.3	Population Forecasts in the RWRP-SE	21
2.2.4	Tourism and Recreation	23
2.2.5	Impact of the Covid-19 Pandemic	24
2.3	Natural Resources	24
2.3.1	Geology	25
2.3.2	Groundwater Aquifers	26
2.3.3	Surface Water Systems	30
2.3.4	Groundwater – Surface Water Interaction	32
2.3.5	WFD Ecological Status of Waterbodies	32
2.3.6	WFD ‘Risk Status’ of Water Bodies and Associated Pressures	36
2.3.7	Abstraction Pressures	38
2.3.8	Designated Sites in the RWRP South East Region	41
2.3.9	Opportunities for Protection, Restoration and Enhancement	45
2.4	Water Supply	46
2.4.1	Rainfall	46
2.4.2	Drought	48
2.4.3	Flood Risk	51
2.4.4	Water Supply Systems	53
2.4.5	Climate Change	54
2.5	Summary	60
2.6	References	62

<b>3</b>	<b>Regional Needs</b>	<b>65</b>
3.1	Introduction	66
3.2	Water Quantity	69
3.2.1	Introduction	69
3.2.2	Current Water Supply	73
3.2.3	Hydrological Yield	78
3.2.4	Current and Future WAFU	79
3.2.5	Current Demand	83
3.2.6	Demand Forecast	85
3.2.7	Supply and Demand Balance	92
3.2.8	Summary	100
3.3	Water Quality	101
3.3.1	Water Quality Compliance	103
3.3.2	Barrier Assessment – DWSP Approach	104
3.3.3	Barrier Assessment – Summary	105
3.4	Water Supply Reliability	108
3.5	Water Supply Sustainability	108
3.6	Summary	111
3.7	References	113
<b>4</b>	<b>Current Status of Infrastructure</b>	<b>114</b>
4.1	Introduction	115
4.2	National Investment Programmes	115
4.3	Progress in the South East Region	116
4.3.1	National Investment Programmes within the Sout East Region	116
4.3.2	Identification of Critical Infrastructure Projects within the South East Region	117
4.3.3	Completed Critical Infrastructure Projects	117
4.3.4	In-Flight Critical Infrastructure Projects	122
4.4	Summary	123
4.5	Conclusions	123
4.6	References	124
<b>5</b>	<b>Solutions – Our Approach</b>	<b>125</b>
5.1	Introduction	126
5.2	Lose Less: Leakage Reduction	127
5.2.1	Three Step Leakage Reduction	128
5.2.2	Leakage Targets and Demand Forecasting	130
5.2.3	Challenges in Meeting Leakage Reduction Targets	131
5.2.4	Leakage Reduction in the South East	132
5.3	Use Less: Water Conservation	133
5.3.1	Water Conservation Activities	133
5.3.2	Domestic Metering Network	134
5.3.3	Grey Water Recycling and Rainiwater Harvesting	135
5.3.4	Water Savings	135
5.4	Supply Smarter	139
5.5	Summary	140
5.6	References	140

<b>6</b>	<b>Option Development</b>	<b>141</b>
6.1	Introduction	142
6.1.1	Option Scale	142
6.1.2	Option Development Process	148
6.1.3	Unconstrained Options	148
6.2	Option Screening	150
6.2.1	Coarse Screening	150
6.2.2	Fine Screening	153
6.2.3	Rejection Summary	155
6.3	Feasible Options	155
6.3.1	Feasible Option Types	156
6.3.2	Option Costing	158
6.4	Project Level Summary	159
6.4.1	Data Review	159
6.4.2	Project Development	160
6.4.3	Project Level Assessments	160
6.4.4	Next Steps	161
6.5	Summary	161
6.6	References	162
<b>7</b>	<b>Preferred Approach – Study Area</b>	<b>163</b>
7.1	Introduction	164
7.2	Approach Development Process	165
7.2.1	Approach Categories	165
7.2.2	Approach Ranking and Appraisal	167
7.2.3	Stage 1 – WRZ Level Approach	169
7.2.4	Stage 2 – Study Area Combinations	185
7.2.5	Stage 3 – Study Area Level Preferred Approach	192
7.3	WRZ Level Approach and SA Preferred Approach	199
7.3.1	SA Preferred Approach Description	199
7.3.2	Assessment against the Six Approach Categories	202
7.3.3	Cost Comparison	208
7.3.4	Alternative Study Area Approach for SAM	209
7.4	SA Preferred Approach	214
7.4.1	Water Supply Sources	214
7.4.2	Existing Infrastructure	215
7.4.3	WRZ Options	218
7.4.4	Study Area Grouped Options	220
7.4.5	Addressing Leakage	225
7.4.6	Addressing Water Quality	226
7.4.7	Environmental Sustainability	226
7.5	SA Preferred Approach Summaries	234
7.5.1	Study Area K – Waterford and South Tipperary	235
7.5.2	Study Area L – Kilkenny	238
7.5.3	Study Area M – Wexford and Wicklow	240
7.6	Interim Solutions	242
7.6.1	Study Area K to Study Area M	243
7.7	Sensitivity Analysis	243
7.8	Summary	247
7.9	References	248

<b>8</b>	<b>Preferred Approach - Regional</b>	<b>249</b>
8.1	Introduction	250
8.2	Challenges to interconnecting supplies across the South East Region	250
8.3	The Regional Preferred Approach	252
8.3.1	Interconnected WRZs	252
8.3.2	Benefits of Interconnecting Supplies	253
8.3.3	Cross-regional transfers	256
8.3.4	Cumulative Effects at Regional Level	257
8.3.5	Transboundary Effects	258
8.3.6	Option Types and Component Summary	258
8.4	Summary	262
8.5	References	262
<b>9</b>	<b>Ongoing Monitoring, Mitigation and Evolution</b>	<b>263</b>
9.1	Introduction	264
9.2	Monitoring and Mitigation	264
9.2.1	Identifying Internal and External Factors that may Impact the NWRP	267
9.2.2	Needs Identification	269
9.2.3	Feedback	269
9.3	Future Actions	270
9.4	References	270
<b>10</b>	<b>Conclusions</b>	<b>271</b>
10.1	Introduction	272
10.2	Baseline of the Public Water Supplies in the South East Region	272
10.3	Plan Development	274
10.4	Plan Outcome	275
10.5	Benefits of the Preferred Approach for the South East Region	276
10.5.1	Reducing Quantity Risk	276
10.5.2	Reducing Risk to Water Quality	280
10.5.3	Reliability and Sustainability	281
10.5.4	Transformation	282
10.5.5	Alignment with Policy	283
10.5.6	Alignment with Investment Planning	283
10.6	Alternatives to the Plan	283
10.7	Interim Options	284
10.8	Conclusions	284
10.9	Next steps	285
